Ir. Kristian Nurwedi, MT	Institute of Technology, Bandung	

Lecturers on sedimentology in Indonesian Universities as FOSI contacts in Indonesia. The list will be updated periodically, input from members are welcome.

As Berita Sedimentologi journal aimed to bridge communications, the editor has prepared a special column for the academia, both lecturer and students. In this column, university researchers, lecturers and even students could contribute their articles.

Students are welcome to submit their papers related to their laboratory, field studies, or campus academic activities related to sedimentary geology.

For students who like to take their opportunity to publish their article, please follow the following guideline:

- Get permission from supervisor
- Get permission from the sponsoring company if applicable.
- Prepare figures such as:
- Map
- Stratigraphic column
- Outcrop photos
- Prepare the text in English

Total pages including the figures should not longer than 3 pages of A4 size paper. The editors are happy to assist further on the paper preparation.

This space will also accommodate news related to student activities such as field trips, seminars, conference, etc. AAPG student chapters, for example, could submit their activity news.
