Berita Sedimentologi

Indonesian Journal of Sedimentary Geology

A scientific Journal published by Indonesian Sedimentologists Forum (FOSI), a commission of the Indonesian Association of Geologist (IAGI)

Berita Sedimentologi was first published in February 1996 as a newsletter exclusively for members of the Indonesia Sedimentologists Forum (Forum Sedimentologiwan Indonesia or FOSI). In its first year, Berita Sedimentologi was published in Indonesian, and starting from 1997, this publication switched to using English as the language communication.

The publication frequency is three issues annually, typically released in April, August, and December.

Topics include sedimentology and stratigraphy of both siliciclastic and carbonate rocks, depositional processes, as well as biostratigraphy, geochemistry, basin analysis, geodynamics, petroleum geology, structural geology, and interdisciplinary sedimentology.

From the Editor

Dear Readers,

As we end another year for Berita Sedimentologi, we reflect on our challenges and successes. In a competitive academic landscape, sourcing high-quality manuscripts remains tough. Despite this, we are proud to have published several important papers this year, contributing valuable insights to sedimentary geology. We are committed to excellence and thank the authors and reviewers for their vital support.

Our primary aim is still to attain national SINTA journal accreditation. This goal drives us to enhance our editorial procedures and elevate the scientific quality of our publications. We are confident that achieving this milestone will enhance the journal's reputation and provide greater visibility for our contributors.

Recently, the Indonesian geoscience community mourned the loss of a true legend, Professor R.P. Koesoemadinata. A pioneering figure, his foundational work has shaped our understanding of Indonesian geology for many years. His passion for discovery and commitment to educating future generations form a lasting legacy. We hope his spirit of scientific inquiry will continue to inspire all geoscientists to explore, question, and share their knowledge. We honor his memory and aim to uphold the high standards he established.

In this spirit, we continue to invite all researchers, academics, students, and practitioners to publish their research in Berita Sedimentologi. Your contributions are the lifeblood of this journal and are essential for the ongoing growth of our scientific community. We welcome a wide range of topics, including all areas of sedimentology and sedimentary geology related to energy, the environment, natural resources, and hazards. We accept both short and long research articles, review papers, and brief communications.

Together, let's keep building a lively platform for geological discussion and make sure that the legacy of pioneers like Professor Koesoemadinata thrives through our shared efforts.

Abang M.S Nugraha
Editor-in-Chief

Editorial Board

Executive Editors

Dr. A.M. Surya Nugraha (Editor-in-Chief)
Earth Observatory of Singapore, NTU, Singapore
Minarwan, Ph.D
Conrad Asia Energy, Jakarta, Indonesia
Dr. Erlangga Septama
Pertamina, Jakarta, Indonesia
Dr. Wahyuningrum Lestari
Khalifa University, Abu Dhabi, UAE
Dr. Dicky Harishidayat
Pertamina, Jakarta, Indonesia
Harya Dwi Nugraha, PhD (DIC)
University of Bergen (UiB), Bergen, Norway
Dr. Reza Syahputra
Universitas Indonesia, Depok, Indonesia
Bob Wikan Adibrata, Ph.D
Independent, Jakarta, Indonesia
Barry Majeed Hartono, Ph.D candidate
Akita University, Akita, Japan
Ricky Andrian Tampubolon, M.Sc
Schlumberger, Jakarta, Indonesia

Associate Editors

Dr. Aldo Febriansyah Putra
Universitas Indonesia, Depok, Indonesia
Dr Max Webb
Heriot-Watt University, Edinburgh, UK
Dr. Dwandari Ralanarko
Pertamina, Jakarta, Indonesia
Jamaluddin, S.Si.,M.Eng
STT Migas, Balikpapan, Indonesia
Adept Titu-Eki, MSc.
Universitas Nusa Cendana, Kupang, Indonesia
Syaiful Alam, S.T., MT.
Universitas Padjadjaran, Bandung, Indonesia
Wildanto Nusantara
Pertamina Hulu Rokan, Rumbai, Indonesia
Dr. Muhammad Sulhuzair Burhanuddin
Hasanuddin University, Makassar, Indonesia
Bentang Anggarajati
IAGF
Putri Riadini, S.T., MT.
Harbour Energy, Jakarta, Indonesia
Lolitha Marheni PhD. Candidate
Kalifa University, Abu Dhabi, UAE
Epo Prasetya Kusumah, S.T., M.Sc
Universitas Pertamina, Jakarta, Indonesia
Pramudya Rinegga Datu Perdana
Universitas Pertamina, Jakarta, Indonesia

Production Editors

Agnes Rahayu, S.T. (Lead Layout Editor)

About FOSI

The forum was founded in 1995 as the Indonesian Sedimentologists Forum (FOSI). This organization is a communication and discussion forum for geologists, especially for those dealing with sedimentology and sedimentary geology in Indonesia.

The forum was accepted as the sedimentological commission of the Indonesian Association of Geologists (IAGI) in 1996. About 300 members were registered in 1999, including industrial and academic fellows, as well as students.

FOSI has close international relations with the Society of Sedimentary Geology (SEPM) and the International Association of Sedimentologists (IAS).

Fellowship is open to those holding a recognized degree in geology or a cognate subject and non-graduates who have at least two years relevant experience.

FOSI has organized three international conferences in 1999, 2001 and the most recently in 2018.

Most of FOSI administrative work will be handled by the editorial team. IAGI office in Jakarta will help if necessary.

The official website of FOSI is:
http://www.iagi.or.id/fosi/

FOSI Membership

Anyone with a background in geoscience and/or involved in practicing or teaching geoscience or related fields can apply for free general membership. Since the organization has just been restarted, we are currently using LinkedIn (www.linkedin.com) as the main database platform. We recognize that it is not the ideal solution, and we may seek an alternative soon. That said, for now, LinkedIn serves its purpose. International members and students are welcome to join organization.

FOSI - Indonesian Sedimentologists Forum

ABOUT THIS GROUP

FOSI was established in 1995 and later became a commission of IAGI (Ikatan Ahli Geologi Indonesia/Indonesian Geologists Association). The association aims to serve as a discussion forum for Sedimentologists in Indonesia to share experiences and knowledge among members. Through partnerships with international organizations like SEPM and IAS, FOSI works to place Indonesian sedimentary geology in a broader context.

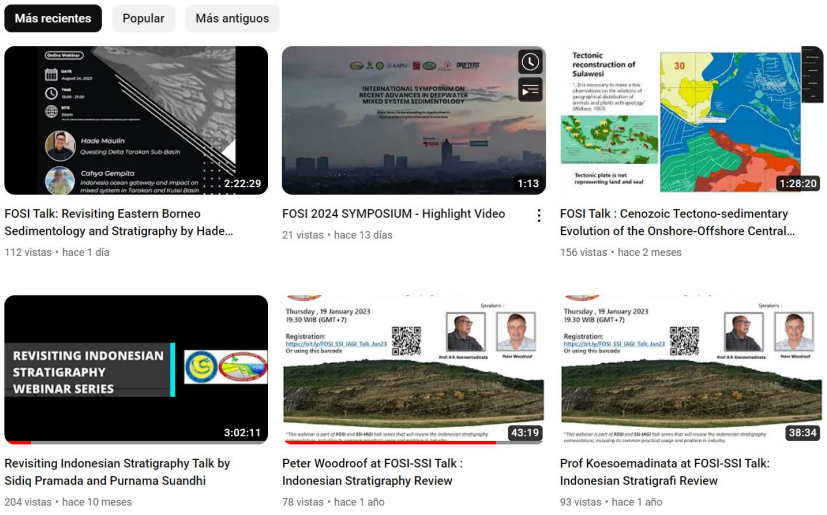

FOSI Group Member as of August 2025:

1,032 members

Including MINARWAN Ph.D and 176 other connections

177
